PROFESSIONAL EXPERIENCE

Tag Retail Systems   **Hull, England**
Junior Software Developer   Mar 2025 – May 2025
- Integrated Vue.js features with an existing C#/.NET backend, debugging API responses and refining logic to improve data accuracy and system reliability.
- Resolved front-end/back-end integration bugs, using structured testing and collaboration with backend engineers to ensure smoother, more stable user workflows.

Tech Educators   **Hull, England**
Teaching Assistant / Location Lead   Jan 2025 – Mar 2025
- Mentored 30+ learners on JavaScript, React, and API integration, supporting them in debugging, project design, and delivery, improving project quality and learner confidence.
- Reviewed weekly projects and provided detailed feedback, leading to higher completion rates and fewer recurring errors.

360 Office Limited   **Hull, England**
Office Manager   Aug 2021 – Sep 2022
- Managed 90+ printers, provided first-line IT support, resolving and escalating issues to minimise downtime.
- Balanced IT troubleshooting and admin tasks, ensuring smooth operations across departments.

Regus, IWG Group   **London, England**
Acting Centre Manager   Nov 2017 – July 2021
- Managed operations for a 200-desk center, liaising with IT teams to resolve issues for 100+ clients.
- Implemented IT reporting processes and onboarding checklists, reducing recurring technical issues for clients.

PROJECTS

E-Commerce App (Team Project) - Live Demo
- Developed key features for a Next.js marketplace, integrating authentication, Stripe payments, and a PostgreSQL database to support reliable core user flows.
- Implemented AWS S3 for cloud-based image storage and API/data-handling logic, collaborating in an agile team to deliver a secure, scalable MVP.

Developer Portfolio (Solo Project) - Live Demo
- Built and deployed a Next.js portfolio site on Azure Linux, gaining hands-on experience with cloud deployment, hosting environments, and troubleshooting deployment issues.
- Implemented performance optimisations, accessibility checks, and responsive layouts, ensuring reliable delivery across devices while maintaining clean deployment workflows.

Rating System with Data Visualisation (Full-stack Project) - Live Demo
- Built a rating system with authentication and Supabase/PostgreSQL integration, implementing secure data handling and efficient querying to support reliable user submissions.
- Designed clear data flow between front-end and backend services, ensuring accurate storage, retrieval, and display of rating data across the application.

EDUCATION

St Mary's University   **London, England**
BA in Business & Management   2010 – 2013
